List of dimensional standards and technical delivery conditions standards

- EN 10216-1. Seamless steel tubes for pressure purposes. TDC, Part 1: Non alloy steel tubes with specified room temperature properties.
- DIN 1629. Seamless circular tubes of non-alloy steel with special quality requirements. TDC.
- DIN 1630. Seamless circular tubes of non-alloy steel with very high quality requirements. TDC.
- DIN 2448. Plain and seamless steel tubes. Dimensions.
- BS 3600. Dimension and masses per unit length of welded and seamless steel pipes and tubes For pressure purposes.
- BS 3601. Carbon steel pipes and tubes with specified room temperature properties For pressure purposes. TDC.
- ISO 9329-1. Seamless steel tubes for pressure purposes. TDC. Part 1: Non-alloy steel tubes with specified room temperature properties.

Steel designation according to EN:

- P - steel for pressure equipments
- 235 - minimum yield strength in N/mm²
- T - steel for tubes
- R - room temperature
- 1,2 - group of quality
- TR 1 - Fluid Transportation - General Purposes (see page 54)
- TR 2 - Piping and Pressure Purposes (PED, AD 2000 Merkblatt W4)

Note: Very often used steel St52 (according to DIN) is now produced as fine grain. For this reason the steel was moved to the part 3 of EN 10216, containing fine grain steel (New name is P355N).

Leakage test according to standards ASTM A (ASME SA)

Within limits it is necessary to use in preference the methods of NDE (NDT), especially for cold finished tubes. If hydrostatic test is agreed, a minimum hydrostatic test pressure is determined by the following equation:

ASTM A450 and ASTM A 1016 (Tube)
 Inch- Pound units: $P = 32000 \cdot t / D$
 SI units: $P = 220,6 \cdot t / D$

The minimum hydrostatic test pressure need not exceed these values:

D (in., mm)	Pressure P (psi, MPa)
1- under 1 (25,4)	1 000 (7)
1- under 1 1/2 (25,4-under 38,1)	1 500 (10)
1 1/2 - under 2 (38,1-under 50,8)	2 000 (14)
2- under 3 (50,8-under 76,2)	2 500 (17)
3- under 5 (76,2 under 127)	3 500 (24)
5 and over (127 and over)	4 500 (31)

The values are valid for ASTM A 450, for ASTM A 1016 is valid value 1000 psi-7 MPa

Higher pressure according to agreement. The tube wall stress shall be determined by the following equation:
 $s = PD / 2t$ (psi. MPa).

ASTM A 530 and A999 (Pipe)

Each length of pipe shall be tested to a hydrostatic pressure which will produce in the pipe wall a stress not less than 60% of the minimum specified yield strength for C-steel pipe:

$P = 2 \cdot St / D$
 $S = PD / 2t$

The minimum hydrostatic test pressure need not exceed 2500 psi (17,0 MPa) for pipe 3,5in or 2800psi (19,0 MPa) for pipe over 3,5 in (88,9 mm)

Permissible tolerances of outside diameter according to ASTM A450/A450M, ASTM A 1016/A 1016M (ASME SA)

Outside diameter			
Hot finished	4" (101,6 mm) and under	- 1 / 32 (0,8 mm)	+ 1 / 64 (0,4 mm)
Cold finished	over 4"-7½" (101,6-190,5 mm) incl.	- 3 / 64 (1,2 mm)	+ 1 / 64 (0,4 mm)
	under 1" (25,4 mm)	- 0,004 (0,1 mm)	+ 0,004 (0,1 mm)
	1" - 1½" (25,4-38,1 mm) incl.	- 0,006 (0,15 mm)	+ 0,006 (0,15 mm)
	over 1½"-2" (38,1-50,8 mm) excl.	- 0,008 (0,2 mm)	+ 0,008 (0,2 mm)
	2"-2½" (50,8-63,5 mm) excl.	- 0,010 (0,25 mm)	+ 0,010 (0,25 mm)
	2½"-3" (63,5-76,2 mm) excl.	- 0,012 (0,3 mm)	+ 0,012 (0,3 mm)
	3"-4" (76,2-101,6 mm) incl.	- 0,015 (0,38 mm)	+ 0,015 (0,38 mm)
	over 4"-7½" (101,6-190,5 mm)	- 0,015 (0,38 mm)	+ 0,025 (0,64 mm)

Ovality for thin-wall tubes [WT ≤ 2% of OD, up to OD=2in (50,8 mm) / WT ≤ 3% of OD for OD over 2in]: Tubes with OD ≤ 1 in (25,4mm) = 0,020in (0,5mm), tubes with OD > 1 in = up to 2% of OD difference of maximum values

Permissible tolerances of wall thickness according to ASTM A450/A450M, ASTM A1016/A1016M (ASME SA)

Wall thickness				
Hot finished	under 0,095" (2,4 mm) 0 +40%	under 0,095" - 0,15" (2,4 - 3,8 mm) 0 +35%	under 0,15" - 0,18" (3,8 - 4,6 mm) 0 +33%	under 0,18" (4,6 mm) 0 +28%
Cold finished	by outside diameter			
	1" - 1½" (38,1 mm) and under	0 *20%	over 1 1½" (38,1 mm)	0 +22%
Welded	0 +18%			

For tubes with OD ≥ 2in a WT ≥ 0,220in (5,6mm) are permitted divergences from average WT: ± 10% for seamless tubes, ± 5% for welded tubes.

Steels for room temperature pressure purpose tubes
